

# eDrive Transmission 1eDT348

New 2-step transmission architecture with fixed ratio for electrified vehicle in the Light Commercial Vehicle segment.

## Specifications

- Max. engine speed: 13,800 rpm
- Max. torque: 348 Nm
- Installation length: 199.6 mm
- Center distance: 185 mm
- Total ratio: 13.18
  
- Max. permissible weight: 3,460 kg (base without trailer)  
4,250 kg (potential upgrade)
- Park lock actuation: cable shift

## Features and Benefits

- Designed with compact transmission package for total GVM up to 4.25 t
- A state-of-the-art transmission concept that can be adapted to the different global customer and market requirements of the future.
- Manual park lock system integrated
- Electrical actuation possible
